# OVERVIEW

DeFi meets Solana, DeFinally...

Solmine is the first official Miner on Solana! Not only is this a 1 of 1 based on that premise alone, we wanted to take it one step further and tap into the great Solana NFT space, which will carry utility throughout the galaxy and onto future projects, giving way for a broader ecosystem!

# HOW TO PLAY

First, users must Approve and Deposit SOL in return for Miners.

Earn rewards Daily, every 24 hours at a rate of roughly 2% per day.

Users have the option to either Compound or Claim.

Users may Hire (Mint) Astronauts to assist them on their journey and mine SOL at a faster rate.

At Last, users may Force Withdraw their base position.

# KEY FEATURES

Minimum Deposit 0.1 SOL

3% Referrer / 1% Referred

24 Hour Compound Timer  
(Auto Optional)

36 Hour Cutoff Timer

NFT Staking Bonus  
(Max 4 for +4%)

Forced Withdraw

Max <1% TVL Once Daily

# AUTO COMPOUND

At a rate of roughly 2% per day,  
miners are hard at work.

With such technologies that took us interstellar, the same technologies offer an Auto compounding function. Every 24 hours, your rewards will automatically be reinvested.

This does cost extra energy to perform/maintain. If you're not using this option, rewards cutoff after 36 hours of inactivity.

# NFTS

We've summoned an amazing collection of 3,000 Astronauts, ready for hire! Hire more crew and stake them for an APY Bonus of +1% per Astronaut.

Users may mint as many as they'd like, although a max of 4 are able to be staked at one time, for a max of +4%.

The utility of this collection holds massive value. Not only is there a staking bonus, Astronaut holders will gain bonuses and perks in all upcoming projects.

Each Astronaut costs 1 SOL. We want Astronauts to be affordable for everyone.

NOTE: There's a 1% chance of minting an ALIEN! Aliens offer supreme powers! 3% APY bonus plus a % of fees in all projects to come!

(2,970 Astronauts - 30 Aliens)

# NFTS CONTINUED

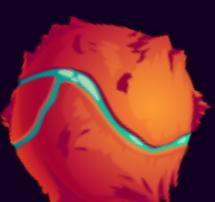

We wanted more of a gamify feel.  
And let's be realistic, space work is tiring.

Each Astronaut, once staked, will work full force, providing the full +1% APY Bonus for 12 hours. That's a pretty long shift, right? After the 12th hour, productivity will reduce by half for the following 6 hours, providing only +0.5% APY Bonus. After that, your Astronaut will be fully exhausted.

To remedy, unstake and leave them rest for at least 8 hours. After 8 hours unstaked, they'll be just like new, ready to take on the day!

Aliens however, will never need rest, they can just jump time back to before they'd gotten exhausted, but.. still in.. present time. Weird, right?

Recommendation: Hire two sets of crewmen so they may work in rotating shifts. 12 hours by 12 hours, to keep a full APY bonus all day long!

**The Solmine NFT Collection will be available on both OpenSea and MagicEden, post mint!**

# FORCED WITHDRAW

Theres an option to Force Withdraw, this allows users to withdraw part or all of their position.

Users may only use this function once every 24 hours.

As an Anti-Whale measure, the maximum amount available for Forced Withdraw is 1% of the TVL at that point in time.

# TAXES

6% on Deposits and Claims

5% per compound if using the  
auto-compound option

80% on early claims  
(6/1 - compound 6 days and  
claim on 7th)

50% on Forced Withdraws

# STRATEGY

The strategy we recommend for the highest chance of success and the best returns on your investment would be the 6/1 method.

After deposit, compound 6 days, claim on the 7th. Use the Auto Compounder function for a small fee.

Next, explore your way onto the Mint Page, mint 4 Astronaut Crew Members, then come back and stake them for the full 4% APY Bonus!

If you want to take it one step further, mint an additional 4 Astronauts to rotate your crew into 12 hour shifts. Don't overwork them!

# SECURITY

Being on the Solana Network, smart contracts are called programs, and thus, work a little differently.

The SOLMINE™ Owner will be KYC'd with Encrypto™ and others!

The SOLMINE™ contract/programme will be audited by Encrypto™ and others!

Audit Links: Coming Soon!

# FAQ

## What makes the Solmine different?

- The Solmine is the first and only Miner on Solana, which also implements a gamify aspect via NFTs, that's never been done before! Also, not to mention the owner will be KYC'd, which is something you don't see very often!

## What made you decide to go with Solana?

- Of all 10,000 forks of ROI's and miners, not one has been forked onto Solana. May it be the coding language having such impact, we've got Solana language (Rust) experts working together to create this project. We want to bring more "DeFi" into the Solana network. We believe it's been far overlooked for way too long, now!

## What's so special about this Astronaut NFT collection?

- This NFT collection of 3,000 will be like an actual collection. All with different attributes and rarities. These Astronauts will have such great utility carrying onward into our ever-growing ecosystem, giving bonuses and perks in upcoming projects that will all play into the storyline/theme starting with the Solmine. It's hard telling what their value may be after the 2nd, 3rd, or even 4th project. They will always play a big role in our ecosystem. Also, there's a 1% chance to mint an ALIEN! Aliens will be far more advanced and reap an astronomical amount of rewards vs the already unique Astronauts!

## That's amazing! Aside from the NFT's ever-increasing value, how do I know my funds will be safe?

- The Owner is KYC'd with Encrypto and AnonyDox. Also, the smart contract has multiple audits! Links will be listed!

## Great to hear! You speak of this ecosystem expanding. What's next?

- Strap in and enjoy the ride, my friend! It's definitely something to be super excited about, or at least we are! ;)

# FIRST TIME ON SOLANA?

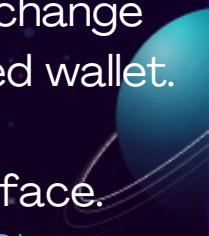

Our recommendation for using SOL on  
the Solana network

Download your choice of any Solana related wallet  
(I personally use Phantom or Solflare)

Buy SOL on any major exchange of your choice  
(Coinbase, Gate.io, KuKoin, etc..)

Transfer your SOL from whichever major exchange  
you've bought Solana on, to your Solana related wallet.

Connect your wallet to the Solmine.io interface.  
(DOUBLE CHECK URL TO BE SOLMINE.IO).
